“Increasing Return On Ad Spend With Facebook Campaign Budget
OPTIMIZATION”

Business Overview

ABOUT THE BRAND

Trend Savvy is an e-commerce platform specially for the fashion fanatics which has a complete variety for Men, women & kids.

Trend Savvy has a wide range of hottest items online at most exclusive prices. From Sunglasses for men to beauty products for women, you can find everything here.

SUCCESS

Trend Savvy company with the leading marketplace used Facebook campaign budget optimization to make its ads more cost-efficient, and generated a 6X return on ad spend over a three-month test period.

Their Goal

INCREASING PROSPECTIVE CUSTOMERS

Trend Savvy wanted to maximize reach and acquire new customers online, while increasing its return on ad spend and lowering its cost per acquisition.

Also, they wanted to test a new approach that would potentially allow it to scale its campaigns in a way that was not only cost effective but that also set them apart from the competition.

OUR PLAN

WE HAVE WORKED ON BELOW PLAN TO ACHIEVE THE DESIRABLE GOALS.

BUCKLE UP AS THIS IS GOING TO BE A LONG RIDE!

We will take this funnel as the backbone of our Facebook funnel & will build our campaigns around it.

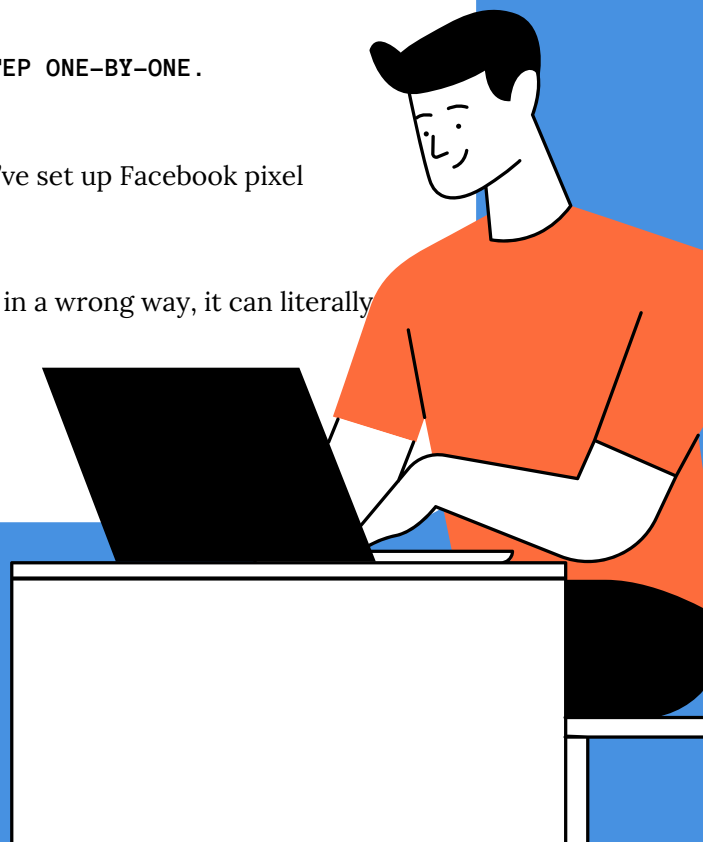

Each stage in this funnel corresponds to the following:

- **Awareness Stage** – This stage corresponds to COLD/ToFU campaigns in your Facebook Ads. In this stage, your audience is fairly new. They have never interacted with your website/brand ever before.
- **Engagement Stage** – This stage corresponds to WARM/MoFu campaigns in your Facebook Ads. In this stage, your audience is acquainted with your website but don't have confidence/trust in your product to buy it.
- **Conversion Stage** – This stage corresponds to HOT/BoFu campaigns in your Facebook Ads. In this stage, your audience has enough trust in your product & now you can openly ask them to buy your product & the conversion rate is highest in this stage.

LET ME WALK YOU THROUGH EVERY STEP ONE-BY-ONE.

But before we start, it is very important that you've set up Facebook pixel accurately on your website.

It holds 90% of the audience data & if it is set up in a wrong way, it can literally mess up with your audience & profits.

OUR PLAN

TOP OF THE FUNNEL – TOFU/COLD CAMPAIGNS

In this section, the users who will interact with your ads will be the ones who have never heard of your brand before.

These people are the ones who have shown interest in your ads as your ad may be too interesting or it may have shown a solution to the problem that they might want to overcome.

These are least likely to purchase or take any desired action on your website.

AUDIENCE

These are some of the examples of what your audience should consist of while setting up a cold campaign.

- Interests
- Lookalikes of Purchase, Initiate Checkout, Add to Cart, etc

PRO TIP

Make sure to exclude Website Visitors, Facebook Engagers from this audience.

This way you will ensure that the audience is purely cold and you are not targeting any previous visitor.

OUR PLAN

MIDDLE OF THE FUNNEL – MOFU/WARM CAMPAIGNS

This audience consists of people who have engaged with your brand or website but not made any sale-oriented action like ATC, IC, etc. on your website.

But so far, they have indicated no interest in buying from you.

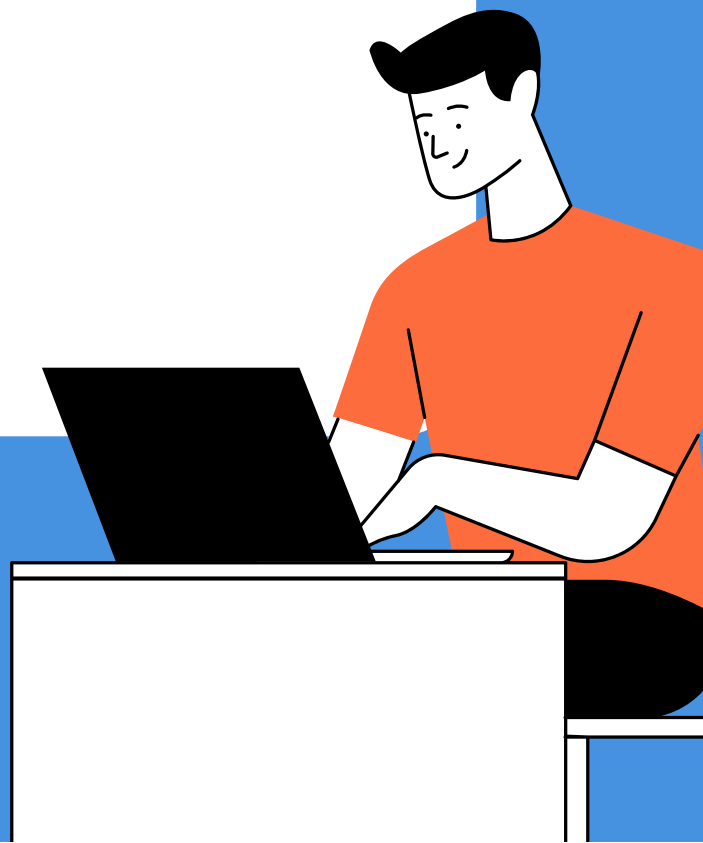

These people need to be educated about your product and brand to get their trust in your brand and convert this warm traffic into purchases.

AUDIENCE

Obviously, the warm audience consists of the people you have accumulated in the Cold campaigns.

Here are some of them:

- Video Views 95%
- Video Views 75%
- Facebook Engagers
- Instagram Engagers, etc.

OUR PLAN

BOTTOM OF THE FUNNEL – BOFU/HOT CAMPAIGNS

This is where your ROAS will jump exponentially and CPA will get lowered down.

This is the real cream!

These people have recently shown interest in your brand/website by taking some desired action like ATC, IC, subscribed to the newsletter, followed your Facebook page, etc. but didn't actually purchase any item from the website.

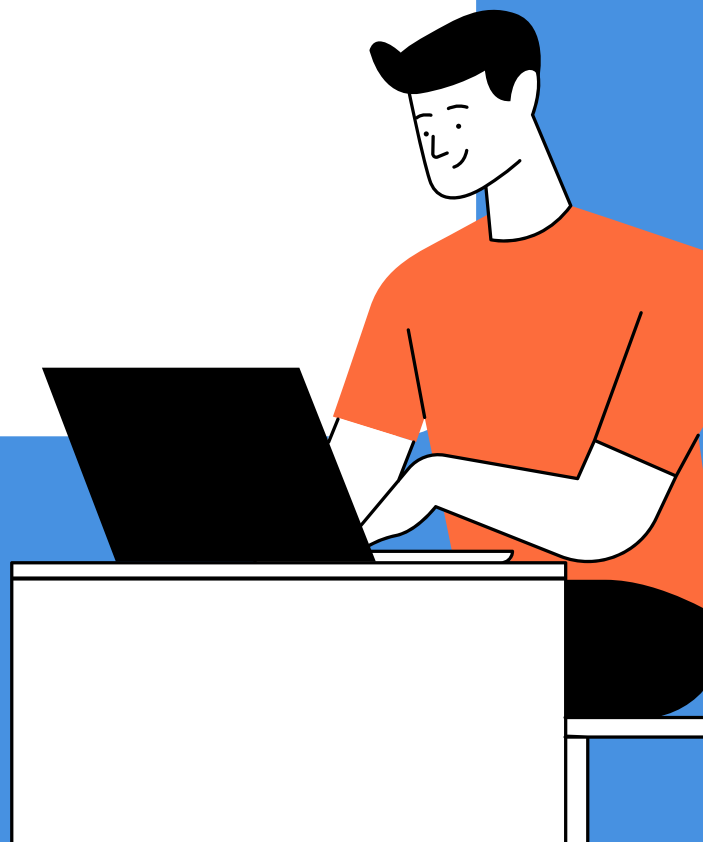

They are well educated now about your brand/product and thus need a little push to make the final purchase.

AUDIENCE

This hot audience is actually a warm audience that is well educated & knows really well about your brand.

Here are some of them:

- View Content – 14D
- Add to Cart – 14D
- Initiate Checkout – 14D
- Email Subscribers – 30D, etc.

Conclusion

Not all marketers know about the concept of COLD, WARM & HOT traffic, and how to best target them separately.

You're missing out on a lot of customers if you're not properly targeting these audiences and providing them relatable content.

Remember, the traffic you are targeting consists of people with different needs and different knowledge levels of your brands and products, and you must warm your audience, make them educated, get trust in your brand & use the power of FOMO for better conversions.

Results

Facebook ads campaign increased brand awareness and attracted new customers. In 1 year, the brand achieved:

40% more people reached over earlier campaign with no dynamic ads.

6X return on ad spend.

40% lower cost per acquisition over earlier campaign.

20% increase in conversion rate with campaign budget optimization.
